

Regulation. Something to smile about?

### Key benefits

- Build risk management, compliance and good governance into all your systems and processes
- Steal a march on your competitors
- Use smarter IT to streamline your entire organisation
- Measure and prove your progress
- Win the trust of your shareholders, customers, partners and people..

### THE CHALLENGE

New regulations are coming in all the time. Which means more and more businesses need to rethink the way they work, from processes to decision-making to managing risk.

But it's about more than the law. It's about your reputation. Those who act first stand to steal a march over their competitors, and gain the trust of their customers, shareholders, supply chain and staff.

### OUR ANSWER

#### Sustainability suite of SAP

First, we'll help you map out all your systems and processes, and work out your main risks. Then we'll use our knowledge of the latest regulations and information technology to design a new set of systems for you. Systems that work together and take less time, money and manpower to run.

#### How it works

- 1. Audit**  
We take an in-depth look at your systems, processes, risks and strategy on the environment, health and safety (EHS).
- 2. Design**  
Based on the audit, we design a new EHS system for you, and give you the means to monitor its performance.
- 3. Deliver**  
We install new back and front office systems that work together, streamline your business and automatically draw up regulatory documents (like SDS and tremcards).

## How we can help

- **Products:** hazardous tracking, managing banned substance lists and other kinds of product compliance (REACH/CFP)
- **Hazardous chemicals:** creating, supplying and managing MSDS (Material Safety Data Sheet), generating reports and labels, tracking substances, Hazmat warehousing and logs, expert compliance checks.
- **Health and safety:** safety checks, risk assessments, security systems, managing incidents and accidents (including near misses and road accidents), medical prevention and care.
- **Dangerous goods:** managing regulatory data, classification and tremcards.
- **Waste:** disposal (internal and external), consignment notes, waste manifests, dangerous goods.
- **Environment:** environmental analysis and reporting.

Basic Data and Tools	Product Safety	Hazardous Substance Management	Dangerous Goods Management	Waste Management	Industrial Hygiene and Safety	Occupational Health
Specification management	Specification management	Substance management	Dangerous Goods Regulatory Data	Waste Basic Data Management	Work Area Data Management	Medical Service
Phrase management	Automatic Product Composition Calculation	Material Safety Data Sheet Import	Dangerous Goods Classification	Hazardous Waste Permit	Work Area Pattern	Proposal List
EH&S expert EH&S easy expert	Rule-Based MSDS Authoring	Rule-Based Classification	Dangerous Goods Checks	Waste Disposal	Work Area Integration	Scheduling
Report generation and report management	Automatic MSDS Generation	Hazardous-Substance-Related Documents	Dangerous Goods Documents	Waste Inventory management	Measurement management	Injury/Illness Log
EH&S web interface	Global Label management	Release of Hazardous Materials for purchasing		Waste Costing	Document Assignment	Brief Consultation
Global label management	Material Safety Data Sheet Shipping	Hazardous Substance Inventory			Incident/Accident Management	Vaccination
Specification information system	EH&S Web Interface	Substance Information System			Standard Operating Procedure	Questionnaire
	Substance Tracking	Life-Cycle Assessment/Eco-Balance			IHS Information System	Occupational Health Documents
					Safety Measures	Exposure Group
					Health and Safety Briefing	Medical Service Accounting
					Questionnaire	Reporting
					Site Inspection	First-Aider Training

## WHY LOGICA?

We're experts in IT. But our knowledge and experience goes far beyond that. Our consultants understand how governance, risk and compliance really work in your industry. So we can help you transform your business over the long-term, using the most up-to-date technology.

Logica is a business and technology service company, employing 39,000 people. It provides business consulting, systems integration and outsourcing to clients around the world, including many of Europe's largest businesses. Logica creates value for clients by successfully integrating people, business and technology. It is committed to long term collaboration, applying insight to create innovative answers to clients' business needs. Logica is listed on both the London Stock Exchange and Euronext (Amsterdam) (LSE: LOG; Euronext: LOG). More information is available at [www.logica.com](http://www.logica.com)
