

ARM SYSTEM MANAGER STREAMLINES OLD AND NEW ON ONE PLATFORM

Key benefits

- Single point of entry for external applications
- Sequential grouping of system interfaces
- XML-based messaging standards
- Supports WebSphere MQ, AQ, JMS and HTTP/HTTPS
- Advanced transaction recovery capabilities
- Centralized security and authentication services
- Business application framework
- In-flight message translation
- Supports sequential message processing

THE CHALLENGE

Integration of new solutions with legacy systems is a significant consideration for any IT initiative. Custom point-to-point interface solutions can be complicated and static. Modern service-oriented architecture (SOA) and XML-based messages often require costly middleware and other enterprise application integration tools. Finally, applying security policies and authorizations to new solutions requires time and expertise.

OUR ANSWER

Logica's Asset and Resource Management (ARM) System Manager is a centralized administration, security, and integration function that offers seamless alignment between legacy systems and external applications.

Pre-configured SOA and XML-based messages enable an exchange of information from hundreds of inbound messages. Advanced message tracking with detailed audit trail and message history allows your IT department to quickly identify and resolve delivery issues.

An intuitive configuration module enables end users to manage the look and feel of the application as well as their own data. And, each application within the ARM Suite utilizes an authentication service to verify user authorization. This empowers security personnel to define individual access rules in compliance with company policies.

ARM System Manager fits easily into your existing architecture and allows you to select an underlying platform such as Windows, Solaris, or AIX. It is pre-configured and integrated to meet your entire asset and resource management needs, yet flexible enough to integrate with your existing critical applications. Integrate with style. Configure with ease. Streamline with Logica.

WHY WORK WITH LOGICA?

We have a flexible, collaborative culture. Our innovative, practical solutions are tailored to client needs. We deliver a blended service model that combines local knowledge with global resourcing. We engage our clients on all levels. We pioneer technology across industries in recognition of the world beyond IT. And, we create new ways for clients to succeed. Our goal is to be brilliant together with you.
