

Whatever you hope
to achieve we can
get you there

THE CARBON REDUCTION COMMITMENT – ENERGY EFFICIENCY SCHEME

FEEL GOOD ABOUT SAVING MONEY

How many times a day do you read or hear about climate change, sustainable economic development and achieving energy security? It's like a storm cloud that hangs over the global business world. Governments are starting to respond, and in the UK the Carbon Reduction Commitment – Energy Efficiency Scheme (CRC-EES) legislation has been enacted to reduce carbon consumption within its borders. If your organisation spends more than £500,000 pa on energy, your Finance Director needs to be aware of what is happening.

Parts of the private sector, such as supermarkets, are already coming together to respond to this challenge through collaboration and shared services. In our view, this approach is also the right one for public sector organisations. Why? We believe it offers significant opportunities to compare energy use across your organisation and understand where best to generate savings.

As just one example: Logica has introduced in Växjö, a town in southern Sweden, an innovative concept known as the Online Monitoring Tool (OMT), a user-friendly, web-based tool that provides customers of electricity and other utilities with detailed information about their usage. Recent evidence shows this knowledge leads to changes in behaviour and lower consumption. Since the tool was introduced, those using it are four times more energy efficient than those who don't use OMT. The town has since been voted the 'greenest in Europe'.

This complex scheme demands that your organisation proves it understands, can predict and manage energy consumption, while systematically monitoring progress against your set targets. We see the best way of achieving this is through the installation of automated meters and an energy data management service that will display your daily energy use and carbon footprint dashboard. We can help you capture the data, but our particular strength is helping you interpret it and make real savings. This data will instantly highlight any energy problems occurring which are costing your organisation money – allowing you to make tactical fixes quickly. But even more importantly, the provision of the data in this format can be used to change behaviour.

Why choose Logica?

- **Managed service:** provision of a unique online AM&T (Automated Monitoring & Targeting) platform
- **Independence:** we are not an energy supply company tying you to a contract
- **Credentials:** Logica is a 'Sunday Times Top 50 Green Company'
- **Credentials:** we are ranked 1st in our field in the Carbon Disclosure Project's Global 500 report
- **Track record:** we have an outstanding 25 year track record helping organisations share information and save money

“Logica has introduced an innovative web-based tool that provides customers of electricity and other utilities with detailed information about their usage. Recent evidence shows this knowledge leads to changes in behaviour and lower consumption.”

WHY DO YOU NEED TO ACT NOW?

The legislation requires a Director of all eligible organisations to take responsibility for submissions to the scheme. The scheme incorporates significant financial implications for those organisations that comply, but also includes civil and criminal penalties to those not adhering to the new legislation. All participants in the scheme will be evaluated and ranked on a number of metrics, and then the tables will be made available to the general public online and through the national press. This will commence from mid 2011. A government backed communication programme has begun. Details can be found at www.environment-agency.gov.uk. If you have not already responded, you need to act now.

WHAT OPTIONS DO YOU HAVE?

Buying Solutions has helpfully put in place a framework for Automated Meter Reading (AMR) and Associated Services that makes it easy for you to procure the services you require from Logica. We can help you save money, reduce energy use, ensure your organisation is compliant and prevent the risk to your reputation from a failure to achieve a place near the top of the league table. Details of the framework can be found at the Buying Solutions website - www.buyingsolutions.gov.uk. Your other options are to:

- procure appropriate services yourself which will be time consuming, expensive, and will not give you the scale economies negotiated on your behalf by Buying Solutions
- take a solution from your energy supplier(s) which is likely to lock you into that supplier and not give you a unified view of all of your utility consumption – water, electricity, gas and other fuels

WHY CHOOSE LOGICA?

- Managed service: provision of a unique online AM&T (Automated Monitoring & Targeting) platform
- Independence: we are not an energy supply company tying you to a contract
- Credentials: Logica is a ‘Sunday Times Top 50 Green Company’
- Credentials: Logica is ranked as the UK’s number one IT services provider for utilities by Pierre Audoin Consultants (PAC)
- Track record: we have an outstanding 25 year track record helping organisations share information and save money

If you would like more information on our services and the Buying Solutions framework, please email us at aMT.UK@logica.com or call 0207 954 9111.

Logica is a business and technology service company, employing 39,000 people. It provides business consulting, systems integration and outsourcing to clients around the world, including many of Europe’s largest businesses.
